

CONSTRUCTION DIVISION

Engineered connections. Regional market access.

Fastening systems, technical support and manufacturer representation for the built environment.

TECHNICAL PRODUCTS. REGIONAL OPPORTUNITIES.

DIVISION OVERVIEW

Built around the application.

PEAK connects technically capable fastening manufacturers with construction opportunities and supports the path from specification to site.

01

Understand

Start with substrate, load, environment and installation conditions.

02

Coordinate

Support product selection, submittals, testing and technical discussions.

03

Develop

Engage relevant consultants, contractors and specialist applicators.

04

Follow through

Coordinate qualified enquiries and project progress with the manufacturer.

PRODUCT RANGE

Construction solutions.

Representative categories for manufacturer partnership and project discussions.

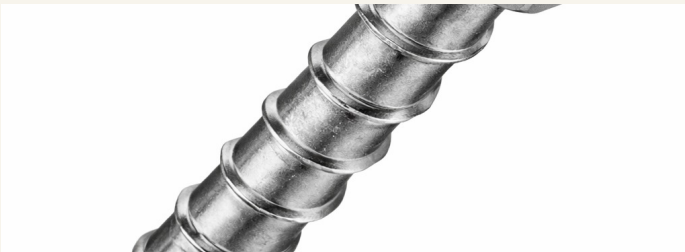

Mechanical anchors

Heavy-duty connections for concrete.

Chemical anchors

Bonded anchoring systems.

Concrete screws

Efficient direct fastening.

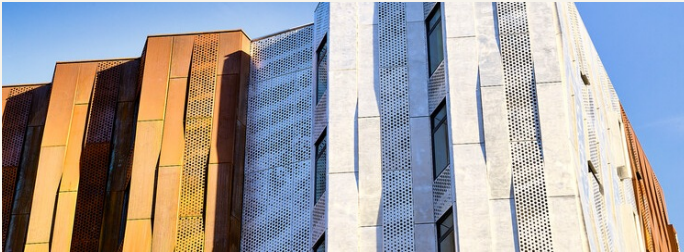

Installation tools

Tools for correct application.

BUILDING ENVELOPE

Fixing the complete envelope.

Focused systems for facade, roofing, insulation and solar applications.

Facade & cladding

Connections for modern building envelopes.

Roofing & cladding

Fixings for roof and wall systems.

Insulation systems

Mechanical insulation fixings.

Solar installations

Fixings for renewable-energy systems.

TECHNICAL PATHWAY

From specification to site.

A practical technical-commercial pathway designed around manufacturer capability and actual project requirements.

01

Product positioning

Match product strengths with relevant applications and decision makers.

02

Documentation

Coordinate technical data, certifications and submittal requirements.

03

Testing & approvals

Support agreed testing and consultant or contractor discussions.

04

Site follow-up

Maintain communication through enquiry, trial and project stages.

APPLICATIONS

Where performance matters.

Fastening solutions serve demanding structural, envelope, industrial and infrastructure applications.

01

Commercial & residential

Anchoring and envelope connections for buildings.

02

Infrastructure

Bridges, public buildings, airports and transport assets.

03

Industrial

Factories, process facilities and engineered installations.

04

Renewables

Solar rooftops and supporting connection systems.

REGIONAL FOCUS

Market development. Defined scope.

Territory, product responsibility and commercial arrangements are agreed before engagement.

- 01 UAE & Abu Dhabi**
Construction, infrastructure and specialist-subcontractor opportunities.
- 02 Wider GCC**
Project-led development subject to local commercial requirements.
- 03 Malaysia**
Market exploration through an appropriate local route where required.
- 04 Manufacturer origins**
North America, South America, the UK and Europe.

MANUFACTURER PARTNERSHIPS

Your products. Our regional focus.

Discuss construction manufacturer representation, project development and market access for the UAE, GCC and Malaysia.
